

EMERGENCY SYSTEM

VACUUM FIXATION SPLINTS

The vacuum fixation splints have multiple uses and ensure considerable stability and fixation of injured body parts in required positions when first aid is given.

ADVANTAGES

- They suit any patient body shape
- Great thermal insulation
- X-ray porous
- Easy and fast serviceability without usage of the outside pressure
- Stable, durable and compact construction
- Washable and disinfectable
- Can be used in wide range of temperatures
- Maximum safety and comfort for a patient
- Multiple uses save a lot of money
- They are very light
